7806556817

Complete availability except for Tuesday and Thursday evenings (from 5 P.M. onwards).

Work Experience

Server/Hostess

The Sugar Bowl Cafe - Edmonton, AB

December 2018 to March 2020

Practiced teamwork in a tight, busy environment. Served food and beverages (including espresso and alcoholic drinks), and communicated modifications for allergies/dietary preferences to kitchen staff via a MICROS POS system, managed waiting lines, answered the phone, bussed tables, restocked items, and documented transactions in a checkout form after each shift.

Medical student & resident

University of British Columbia & University of Alberta - Edmonton, AB

August 2011 to October 2018

Interviewed patients, provided patients with health information, performed physical exams, verbally presented medical histories and proposed management plans to staff physicians, ordered medications in-hospital, collaborated with allied health professionals (nurses, pharmacists, OT, and PT) to provide patient care. Self-directed learning and research around patient cases, formally (presentations) and informally taught other residents and medical students, prioritized daily workload under multiple supervisors, created diagnostic reports using medical software. Created work schedules and organized resident meetings as Co-Chief Resident.

Grocery store cashier

Fairway Market - Victoria, BC

January 2011 to May 2011

Memorized produce codes, scanned items for purchase, and bagged groceries.

Research assistant

Dr. Terry Pearson, University of Victoria - Victoria, BC

August 2010 to August 2010

Assisted in developing an immuno-mass spectrometric method to quantify host defence peptides in blood by creating monoclonal anti-peptide antibodies, characterizing these antibodies using ELISA, peptide enrichment using antibodies and Dynabeads, and peptide detection by MALDI-TOF.

Research assistant

Dr. Connie Eaves, BC Cancer Research Centre

2009 to December 2009

Bisulphite sequencing, Vector NTI, and "QUantification tool for Methylation Analysis" were used to develop a method to characterize murine stem cell subtypes, subcloning and homologous recombineering was employed to create a reporter construct, and flow cytometry was used to analyze murine peripheral blood for positive engraftment.

Santa's helper

Japan Camera 1 Hour Photo in Mayfair Mall - Victoria, BC
2008 to December 2008

Cashiered at the store and Santa photo booth, demonstrated the use of the digital photo kiosk, updated store displays, assisted patrons using inventory knowledge, and organized stock.

Research assistant

Dr. Patrick von Aderkas, University of Victoria - Victoria, BC
August 2008 to August 2008

Assisted in experimental design. Collected pollination drops and dissected plant samples under a microscope. Ordered and organized chemical stock and laboratory equipment.

Research assistant

Dr. Real Roy, University of Victoria - Victoria, BC
April 2008 to April 2008

Assisted in soil experiments: field work to collect gas and soil samples, produced media (e.g. nutrient broth agar), produced pure bacterial cultures using pour plate and streaking methods, gas chromatography and soil DNA extractions were performed, and lab equipment was autoclaved.

Medical office assistant for family physician

Dr. Herman Lee Inc - Victoria, BC
August 2007 to August 2007

Booked appointments for patients, and contacted hospitals and other physicians over telephone. Completed medical forms, updated and organized patient files, and assisted in billing. Tidied examination rooms and kept medical supplies well stocked.

Annual Giving Student Caller

University of Victoria - Victoria, BC
June 2007 to June 2007

Telephoned Uvic alumni to fundraise for Uvic faculties and programs. Updated contact information, kept alumni involved in the university community by informing them of social events, current developments, and support available for alumni. Engaged alumni in conversation through friendliness and by conveying interest in their career paths and continuing ambitions.

Dishwasher

IQ Bistro, University of Victoria - Victoria, BC
June 2007 to June 2007

Worked alongside the chef in a fast-paced setting ensuring that equipment is clean and ready for use, used the sanitizer to clean large loads of dirty dishware, disinfected freezers and food preparation areas, updated inventory, and made nachos.

Education

Pathology

University of Alberta - Edmonton, AB

July 2015 to October 2018
